

# PEELABLE GLASS PAINT

## PRODUCT INFORMATION: *FOR ALL SHINY SURFACES, OUTSIDE & IN*

“Thorndown’s Peelable Glass Paint is a revolutionary product that has changed the face of greenhouse shading. Formulated using a 100% recycled plastics resin it gives ‘post-consumer recycled plastics’ formerly destined for landfill, another lease of life. Although designed so that the coating can be peeled off, it is also highly durable and water-repellent so could stay on for years. Shades and colours, then leaves no trace.”

Peelable Glass Paint is a high-performing product that effectively reduces internal temperatures in greenhouses, conservatories and orangeries. Made with strong exterior-grade VOC free colour pigments, it comes in an opaque heritage and translucent arts & crafts colour range so you can match shading to joinery Wood Paint colours, or create a piece of art. Being water-based and with minimal VOC and odour you can happily paint it inside or out. Great for paint enthusiasts and keeping the kids occupied.

Designed as an easy to use greenhouse shading product it is also perfect for use in conservatories or to create security or privacy screening on over-looked windows. Greenhouse shading no longer has to be a painful, dull and laborious task with endless scrubbing. Create works of art in homes and gardens then simply peel it off!

-  Use **indoor** or **outdoor**. Paint on then **peel off** to remove
-  Revolutionary, carefully crafted high performance **Eco paint** – water-based eco product with minimal VOC (Volatile Organic Compounds) at 0.05%, and low odour
-  Made from a 100% already **recycled plastics resin**
-  Available in 24 **opaque colours** & 14 **translucent** for arts & crafts or lighter shading. Colours **mix** easily
-  Effectively **reduces internal temperatures**, protecting plants and people
