THORNDOWN

WOOD PRESERVER

PRODUCT INFORMATION: *FOR ALL EXTERIOR WOOD*

THORNDOWN WOOD PRESERVATIVE is a ready to use, water-based wood preservative, designed to protect new and existing softwood timber without ground and water contact.

It protects timber against brown rot (*Gloeophyllum trabeum*, *Coniophora puteana*, *Poria placenta*) and blue stain fungi (*Aureobasidium pullulans* spp, *Sclerophoma pithyophilla*). Made for outside application on wood.

-  Protects timber against **brown rot** and **blue stain fungi**
-  Use in Class 2 and 3 cf. DS/EN335: 2013. Conforms to EN 113 after EN 84 / EN 73 and EN 152
-  **Drying time** - quick drying - dry in 1 hour in fine weather conditions (23°C and 60% relative humidity)
-  Acts as a **primer**
-  **Overcoat** in 6 hours to 4 weeks
-  **Ready to use**
-  **Preserves new** and **existing softwood**
-  For **outside** application on wood
-  **Coverage** - treatment rate of 180 to 220 ml/m² equalling approximately 5.5 m² per litre - giving you 2 coats on planed surfaces, or 1 coat on rough sawn timbers as it soaks in more treatment
-  **GB-BPR approved wood preservative** Registration Number GB-2013-0783-1-0002
-  **Water-based** with **low odour**
-  **Coats** - 2 coats for planed (smooth) timber and one for rough sawn
-  **Usability** - apply by brush, or roller for DIY. Easy to clean up with water and mild soap
-  Produces **excellent broad spectrum protection** against **wood destroying & blue stain fungi**
-  Can be used **DIY, professional** and **industrial**
