## PRODUCT RANGES

### HIGH PERFORMANCE PAINTS FOR THE HOME & GARDEN

Thorndown has everything you need to decorate your home and garden. All of our paints are designed using the finest raw materials to create high performance, durable water-based eco paints with minimal VOC and virtually no odour, that are a pleasure to use.

- Strong exterior grade VOC free colour pigments give all of our paints deep, rich and long-lasting colours with high resistance to UV degradation & colour fade that stay true for many many years
- Minimum of prep required; all can be easily painted on previously coated clean and dry surfaces
- Adhere well to most surfaces without a primer
- Water resistant, micro-porous coatings that allow surfaces to breathe. Durable for easy cleaning
- Mix colours together easily to create bespoke shades
- 1800 RAL Classic & Design colours, 2050 NCS, 434 British Standard BS318C BS4800 BS5252F, and 924 Pantone C colours also available
- Can dilute Wall Paint for a mist/primer coat and Wood Paint for a wood stain effect
- Dry in 1-2 hrs in fine conditions with great coverage
- Easy clean-up with water

### PEELABLE GLASS PAINT

Unique shading and arts & crafts paint made with a 100% recycled plastics resin. Paint on greenhouse and conservatory windows for shading to reduce internal temperatures, windows & doors for privacy screening, & any shiny surface for decorative designs. Can be applied internally & externally. Peel off at the end of the season or leave on for a long-lasting, water-repellent coating.

**Stencil Craft Packs** available in Seasonal and Floral designs containing durable stencils and 4x40ml tins.

### NICE CANS

*For your convenience, our tins have been designed with a wider top for easy painting, and more air space above the paint level for easy mixing.*

## PRODUCT RANGES

### HIGH PERFORMANCE PAINTS FOR THE HOME & GARDEN

#### WALL PAINT

Designed to be the best interior paint on the market, tested and proven to be tougher than other brands. Stunning high-performance eco paint with deep, lush colours that sit in a highly durable and dirt resistant coating. Flat matt finish at <3% gloss. Made with sustainable fillers from recycled waste marble & resin made from recycled car windscreens plastic material.

So good it can be used without a primer on all walls, ceilings, metal, and wood surfaces from skirting boards, window frames and doors to furniture.

#### WOOD PAINT

Specifically designed for exterior timber but also perfect for all interior wood. Highly durable and water-repellent coating, suitable for all softwood, hardwood, tropical woods, Accoya, pressure-treated, mdf & plywood. Grain visible with a beautiful satin sheen.

Blend of resins including a 100% recycled plastics resin that adheres really well to surfaces without a primer. Also coats metal and plastic including uPVC frames.

#### STAIN BLOCKING PRIMER

High performing wood surface primer primarily developed for tannin and stain blocking on timber surfaces. Works on all untreated softwood and hardwood timber surfaces including pine, cedar, redwood, plywood, MDF and hardboard. Also suitable for pressure-treated timber, Accoya, and all painted surfaces of timber, masonry and plaster.

Available in Clear, White, Grey and Black to suit all painted colour top coats.

#### WOOD PRESERVER

Ready to use, clear, water-based wood preservative designed to protect new and existing softwood timber without ground and water contact.

Protects timber against brown rot and blue stain fungi. The product is made for outside application on wood. Target end-use market is DIY, professional and industrial. To be used in Class 2 and 3 cf. DS/EN335:2013.

**Please visit [Thorndown.co.uk](http://Thorndown.co.uk) for full product information and application advice on all paint ranges, and to purchase for home delivery.**

## APPLICATION GUIDE

### PREPARATION

Make sure all surfaces are sound, clean and dry. Remove any grease or oils with a soap solution or something like sugar soap for stubborn areas.

For Wall Paint and Wood Paint fill any holes and sand to a flat surface. Flaking paint and rust should be removed prior to painting.

If painting onto wood surfaces that may be prone to resin bleed or tannins coming out of the timber, apply 1 or 2 coats of Stain Blocking Primer before painting to avoid paint coatings becoming stained.

With Wall Paint porous surfaces or fresh plaster should be sealed first with a diluted 'mist' coat, making sure plaster is thoroughly dry before application.

### DILUTION

For a mist/primer coat, dilute Wall Paint by approximately 30% water increasing to 40% water in hot, dry conditions, otherwise use paint straight from the tin.

With Wood Paint if you want a wood stain or wash effect (instead of solid paint coating) dilute with water up to 1:1 (50%). For full protection, you can then use an undiluted top coat of Thorndown's 'UV Clear' Wood Paint.

### APPLICATION

Best Shaken & Stirred! Mix paint thoroughly before and during. Use a good quality synthetic brush, roller, or HVLP sprayer. No need to dilute any of our paints when using a sprayer. For best results use a paint roller with a foam sleeve when painting Peelable Glass Paint for shading.

When coating large areas, cover up to still-wet paint to avoid an uneven patchy coating. When painting wood apply with the grain. For translucent Wood Paints apply like a wood stain, working small amounts into the surface along the grain.

Avoid the rain if painting externally and allow plenty of time for the paint coating to fix and cure fully before rain is due. Usually 24 hours but in cold and damp conditions Peelable Glass Paint may require up to 48 hours. In autumn to spring when night temperatures are cold and condensation high, Peelable Glass Paint should be left for 24-48 hours to dry before applying additional coats to give plenty of time for it to bond fully so that a further coat won't cause damage to prior coats.

## APPLICATION GUIDE

### COATS

Peelable Glass Paint only requires one coat for shading. When applying paint to see-through surfaces such as glass you will see application marks as light passes through. Further coats will reduce this and increase the opacity of the coating. Wall Paint and Wood Paint require two coats for a full, deep coating. Three coats will enhance lighter colours and increase opacity of coating. Horizontal surfaces should have three to four coats.

### DRYING

In fine weather, a single coat dries easily in under an hour. Drying time is extended in cold damp conditions.

### CLEANING UP

Use hot or cold water, with or without detergent, on paint-wet equipment. Be very careful not to allow sprayer nozzles to dry out or they'll block up.

### REMOVAL OF PEELABLE GLASS PAINT

If left the coating is water-repellent, durable and can last for years, or if you want to remove it pick at a corner and peel it off. If the coating has been left on for a long time and dried out, soak with water to restore elasticity, or overcoat leaving to dry for 24-48 hrs, then peel off.

### DISPOSAL

Please don't throw away unused or dried paint or preserver into drains or watercourses. Most local authorities have free facilities for disposing of paint. Clean empty tins are fully recyclable as is all packaging.

### STORAGE

Paint will keep for approx. 2 years or more in a sealed tin stored out of freezing or extremely high temperatures. Mix well before use with a paint stirrer or hand blender.

### COVERAGE

#### PEELABLE GLASS PAINT

You'll paint up to 12m<sup>2</sup> of glass (one coat) with one litre.  
**40 ml** up to 0.48m<sup>2</sup>    **150 ml** up to 1.8m<sup>2</sup>  
**450 ml** up to 5.4m<sup>2</sup>    **750 ml** up to 9.0m<sup>2</sup>

#### WALL PAINT

You'll paint up to 12m<sup>2</sup> of a flat surface (one coat) with one litre. So each paint can will do approximately:  
**150 ml** 1.8m<sup>2</sup>    **750 ml** 9.0m<sup>2</sup>    **2.5 l** 30m<sup>2</sup>

#### WOOD PAINT

You'll paint 6m<sup>2</sup> to 12m<sup>2</sup> of timber surface (one coat) with one litre; rough sawn surfaces will take a lot more paint than a smooth surface and second coats take less than the first. So each paint can will do approximately:  
**150 ml** 0.9m<sup>2</sup> to 1.8m<sup>2</sup>    **750 ml** 4.5m<sup>2</sup> to 9.0m<sup>2</sup>  
**2.5 l** 15m<sup>2</sup> to 30m<sup>2</sup>    **10 l** 60m<sup>2</sup> to 120m<sup>2</sup>    **20 l** 120m<sup>2</sup> to 240m<sup>2</sup>

THORNDOWN

# ALL PAINTS COLOUR CHART

WALL PAINT

PEELABLE GLASS PAINT

WOOD PAINT

HIGH PERFORMANCE ECO PAINTS FOR THE HOME & GARDEN.

CONTAIN A RECYCLED PLASTICS RESIN & VOC FREE COLOUR PIGMENTS.

### TRANSLUCENT WOOD TONES

WOOD PAINT COLOURS ONLY

Allows the grain and natural beauty of wood to show through the coating

**PAINT COLOURS**  
 We can produce all opaque colours in all of the paint ranges so contact the office to order if one isn't available online. There are also over 1800 RAL Classic & Design, 2050 NCS, 434 British Standard BS318C BS4800 BS5252, and 924 Pantone C colours available within the tinting colour systems giving thousands of colour choices and colour matching options. Order online or contact the office via phone or email for colour matching.  
 The flat matt finish of Wall Paint can make colours appear slightly darker than with the soft satin finish of Wood Paint.

### TRANSLUCENT ARTS & CRAFTS

PEELABLE GLASS PAINT ONLY

Allows more light to pass through the coating than with opaque colours

\*SO: Semi-opaque made in a clear base for extra vibrancy of colour (may require an extra coat for solidity & depth of colour compared to opaque colours)

Colour chart swatches are a printed representation of colours and intended only as a guide. Please use sample pots and paint up test areas so you can see how the paint will look in situ & lighting conditions.

Please contact the office to order an individual colour chart for Peelable Glass Paint, Wood Paint and Wall Paint ranges, including the Wall Paint colour chart with hand-painted colour chips.

Visit our website [thorndown.co.uk/Advice](http://thorndown.co.uk/Advice) for full product information and application advice for all of our paint ranges, particularly Wood Preserver and Peelable Glass Paint which has unique properties.
